TECHNICAL SUPPORT PROFESSIONAL | CUSTOMER & TECHNICAL SUPPORT | TROUBLESHOOTING & DOCUMENTATION

PROFESSIONAL SUMMARY

Technical support professional who resolves hardware, software and access issues by phone, email, remote session and onsite for 300+ users over my career across manufacturing, nonprofit and corporate environments, backed by nearly two decades of customer-facing service. Documents issues clearly, partners with engineers and leadership to resolve them, and builds repeatable processes that save time, including cutting fully configured machine deployment from about 2 hours to about 30 minutes. Associate's degree in Computer and Information Systems; Google Cybersecurity Professional Certificate; studying for CompTIA Security+.

CORE SKILLS

Customer & Technical Support (phone, email, remote, onsite) • Troubleshooting & Root-Cause Analysis • Ticketing & Case Documentation • Technical Documentation • Windows & Linux • Microsoft 365, Exchange, Active Directory • Workstation Imaging, Hardware Deployment & Upgrades • Remote Monitoring (SolarWinds) • Endpoint Security (Bitdefender, MFA, Patching) • VPN • User Training • Process Improvement

SELECTED ACHIEVEMENTS

- Cut initial response time on standard day-to-day requests from roughly 60 to roughly 30 minutes, and on critical emergencies from roughly 30 to roughly 15 minutes (about 50% each), by helping centralize email, phone and in-person requests into one ticketing process.
- Helped standardize setup of the Windows 10 computers that run Micro-LAM's customer-delivered laser-guided manufacturing systems (50+ systems), cutting per-system setup from about 2 hours to about 30 minutes so systems reached customers faster.
- Deployed or configured 300+ workstations across my career.
- Resolved roughly 60–80% of support requests the same day.
- Supported 300+ users across my career, including approximately 150–200 users for nonprofit and commercial clients through onsite, remote and phone support.
- Helped reduce a client's telecommunications expenses by approximately \$1,000/month (~\$12,000+ annualized) through migration to 3CX VoIP.

PROFESSIONAL EXPERIENCE

Business Systems Analyst (Contract Supporting Micro-LAM) — Integrated Technologies, Kalamazoo, MI 2021 – 2022

Outsourced IT support for Micro-LAM, a precision manufacturing company.

- Provided day-to-day technical support for approximately 50 endpoints across engineering, manufacturing, administrative and executive teams, handling approximately 25–50 support requests per week.
- Helped design a centralized ticketing approach in Syncro for requests arriving by email, phone and in person, improving visibility and prioritization: initial response on standard requests moved from roughly 60 to roughly 30 minutes, and on critical emergencies from roughly 30 to roughly 15 minutes.
- Supported specialized equipment-connected environments, including SolidWorks, precision optical measurement systems and electron microscopy workstations.
- Partnered directly with engineers, managers and CFO-level leadership to keep technology supporting production.
- Helped develop Micro-LAM's Windows 10 golden-image process (Macrium) for proprietary laser-guided manufacturing systems. Standardized drivers, security updates and software configuration, reducing setup time from about 2 hours to approximately 30 minutes and enabling deployment of 5–10 units per day during peak periods.
- Deployed Bitdefender protection, managed VPN access for distributed engineering teams, and maintained inventory tracking and remote monitoring.
- Upgraded research-and-development machines to SSDs, improving reliability and peripheral loading times.

Partner | IT Support Lead (Part-Time) — eLucid Solutions, Kalamazoo, MI 2018 – 2021

Managed IT services for nonprofit and commercial clients, supporting approximately 150–200 users as part of a three-person IT team and handling approximately 25–50 support requests per week.

- Served as a primary technical resource for the Kalamazoo Gospel Mission through onsite, remote and phone support, troubleshooting systems and maintaining access for approximately 150 users.

- Built a SharePoint site for the Kalamazoo Gospel Mission with illustrated how-to guides (such as connecting to the wireless network and running a manual antivirus scan) and helped design team sites, including for the media team; staff took over maintaining it afterward.
- Supported Microsoft 365 and Exchange, including account creation, mailbox changes and user updates, plus SharePoint collaboration tools.
- Used SolarWinds to track support requests, monitor alerts and provide remote support.
- Supported malware remediation, password policy improvements, MFA implementation and patch management.
- Configured at least 50 workstations and laptops per year for the Mission, imaging new machines and upgrading existing users from Windows 7 to Windows 10 with their files copied over.
- Worked with senior engineers on Active Directory, user management and infrastructure improvements.
- Assisted with installing a wireless bridge in the Mission's Idea Center, which supports guests working toward their GED and joined two parts of the campus, resulting in fewer dropped connections.
- Assisted with deploying a south-campus server room under a strategy set by senior engineers: racked servers, ran and terminated cable to patch panel ports, connected power and battery backup, and installed remote monitoring and management software.
- Completed 50+ hard-drive-to-SSD upgrades for Mission staff using a data-transfer device (about 90 minutes maximum per machine), replacing failing drives, preserving data integrity and improving productivity.
- Supported migration from traditional phone systems to 3CX VoIP, helping reduce client telecommunications expenses by approximately \$1,000/month.

Crew Member — Trader Joe's, Kalamazoo, MI

2008 – Present

- Help roughly 100–200 customers per shift, resolving questions and concerns in person and building long-term relationships through active listening; recognized in customer letters to the store office and in 5-star Google and Yelp reviews for exceptional service and genuine connection with customers.
- Selected by management to train and mentor 50+ crew members on service standards, procedures and inventory practices.
- Trusted resource for teammates and leadership on procedures, troubleshooting and daily operational challenges.
- Troubleshoot POS systems, tablets, printers and RFID inventory scanners; supported the opening and setup of three store locations.

Systems Administrator / Business Systems Analyst — InsuranceNoodle, Chicago, IL

2006 – 2008

Corporate insurance organization; three-person IT team.

- Supported daily user issues through ticket monitoring, troubleshooting and direct employee assistance.
- Deployed and configured employee workstations; administered Microsoft Exchange accounts; handled onboarding and access changes.
- Supported corporate phone infrastructure, including physical phone installation and voice switch connections.

Specialist — Apple Retail, Chicago, IL

2009 – 2010

EDUCATION AND CERTIFICATIONS

Associate's Degree, Computer and Information Systems — Triton College, River Grove, IL

2003 – 2006

Google Cybersecurity Professional Certificate • CompTIA Security+ (SY0-701), in progress

Languages: English (native); Spanish (basic, two years of high school study)

TECHNICAL TOOLS

Windows • Linux • Microsoft 365 • Active Directory • Exchange • SharePoint • Bitdefender • SolarWinds RMM • Syncro • Macrium • 3CX VoIP • VPN
