BUSINESS SYSTEMS ANALYST | APPLICATION & END-USER SUPPORT | DOCUMENTATION & PROCESS IMPROVEMENT

PROFESSIONAL SUMMARY

Business systems analyst and technical support professional with experience across manufacturing, nonprofit, corporate insurance and retail environments, backed by nearly two decades of customer-facing service. Works directly with end users, from front-line staff to CFO-level leadership, to understand what they need, then troubleshoots and resolves application and system issues and takes ownership through resolution. Writes documentation and how-to guides people can follow on their own, trains others, and improves workflows, including helping centralize support requests into one ticketing process that cut initial response time by about 50%. Eager to earn Epic certification and support healthcare revenue cycle applications. Associate's degree in Computer and Information Systems; Google Cybersecurity Professional Certificate; studying for CompTIA Security+.

CORE SKILLS

Application Support & Troubleshooting • End-User Needs Gathering • Workflow Analysis & Process Improvement • System Documentation, How-To Guides & Training Materials • Ticketing, Issue Ownership & Follow-Through • Outage Response & Vendor Coordination • Stakeholder Communication • Microsoft 365 / Office, Exchange, SharePoint • Active Directory & User Access Management • Windows & Linux • Endpoint Security (Bitdefender, MFA, Patching) • User Training

SELECTED ACHIEVEMENTS

- Cut initial response time on standard requests from roughly 60 to roughly 30 minutes, and on critical emergencies from roughly 30 to roughly 15 minutes (about 50% each), by helping centralize email, phone and in-person requests into one ticketing process.
- Built a SharePoint support site for the Kalamazoo Gospel Mission with illustrated how-to guides; staff took over maintaining it afterward.
- Restored a client's newly deployed VoIP phone system within hours after a lightning strike: had calls routed to a cell phone so no customer calls were missed, moved the configuration to a temporary machine, and worked with the manufacturer to replace the unit at no cost.
- Helped standardize setup of the Windows 10 computers in Micro-LAM's customer-delivered manufacturing systems (50+ systems), cutting per-system setup from about 2 hours to about 30 minutes.
- Helped reduce a client's telecommunications expenses by approximately $1,000/month (~$12,000+ annualized) through migration to 3CX VoIP.
- Selected by management to train and mentor 50+ coworkers on service standards, procedures and inventory practices.

PROFESSIONAL EXPERIENCE

Business Systems Analyst (Contract Supporting Micro-LAM) — Integrated Technologies, Kalamazoo, MI **2021 – 2022**

Outsourced IT support for Micro-LAM, a precision manufacturing company.

- Partnered directly with engineers, managers and CFO-level leadership to understand their needs and keep technology supporting production.
- Handled approximately 25–50 support requests per week for about 50 endpoints across engineering, manufacturing, administrative and executive teams, resolving roughly 60–80% the same day.
- Helped design a centralized ticketing approach in Syncro for requests arriving by email, phone and in person, improving visibility and prioritization and cutting initial response time about 50%.
- Helped develop a Windows 10 golden-image process (Macrium) that standardized drivers, security updates and software configuration, reducing setup from about 2 hours to approximately 30 minutes and enabling 5–10 units per day during peak periods.
- Supported specialized software environments, including SolidWorks, precision optical measurement and electron microscopy workstations; took image backups of custom-configured R&D machines.
- Deployed Bitdefender protection, managed VPN access for distributed engineering teams, and maintained inventory tracking and remote monitoring.

Partner | IT Support Lead (Part-Time) — eLucid Solutions, Kalamazoo, MI **2018 – 2021**

Managed IT services for nonprofit and commercial clients; three-person IT team supporting approximately 150–200 users.

- Served as a primary technical resource for the Kalamazoo Gospel Mission through onsite, remote and phone support, handling approximately 25–50 support requests per week.

- Built a SharePoint support site with illustrated how-to guides (such as connecting to the wireless network and running a manual antivirus scan) and helped design team sites, including for the media team.
- Supported Microsoft 365 and Exchange, including account creation, mailbox changes and user updates; worked with senior engineers on Active Directory and user access management.
- Used SolarWinds to track support requests, monitor alerts and provide remote support; supported malware remediation, password policy improvements, MFA and patch management.
- Configured at least 50 workstations and laptops per year, including Windows 7 to Windows 10 upgrades with user files migrated, and completed 50+ hard-drive-to-SSD upgrades.
- Assisted with deploying a server room and a wireless bridge under strategies set by senior engineers, and supported migration to 3CX VoIP.

Crew Member — Trader Joe's, Kalamazoo, MI **2008 – Present**

Also worked at the Grand Rapids, MI and Oak Park, IL stores.

- Help roughly 200–400 customers per 8-hour shift at the register and on the sales floor, listening closely to resolve their questions and concerns; recognized in customer letters and 5-star Google and Yelp reviews.
- Train and mentor crew members; trusted resource for teammates and leadership on procedures and daily operational challenges.
- Troubleshoot POS systems, tablets, printers and RFID inventory scanners; supported the opening and setup of three store locations.

Systems Administrator / Business Systems Analyst — InsuranceNoodle, Chicago, IL **2006 – 2008**

Corporate insurance organization; three-person IT team.

- Supported daily user issues through ticket monitoring, troubleshooting and direct employee assistance.
- Deployed and configured workstations, administered Microsoft Exchange accounts, and handled onboarding and access changes.
- Supported corporate phone infrastructure, including phone installation and voice switch connections.

Specialist — Apple Retail, Chicago, IL **2009 – 2010**

- Translated technical capabilities into simple conversations centered on customer needs and outcomes.
